🔗 Portfolio   in oscarismaelyemha   ⊙ OscarYemha

I'm an orchestra musician who found in the programming a new passion. Because of this, I decided, after taking an introductory course, to do a coding Bootcamp for becoming a Full Stack Developer. Music and programming share the logical-mathematical aspect and teamwork, things that I really like. I chose to do the Coding Bootcamp of Plataforma5, which has more than 800 hours of intensive training and where I worked whit Scrum (agile framework for software development). I'm currently looking for my first job as a developer while study at the Universidad Tecnológica Nacional (UTN) to be a university technologist in programming.

Projects

"Amazonia": E-commerce, *Technologies: Javascript, React, Node.js, Mongo.* 🔗   2021 – In progress
- A project developed individually in the style of the Amazon website.
